Your community's healthcare pavilion

24/7 emergency department

Coming soon to Steele Creek

CMC-Steele Creek

Uncompromising Excellence. Commitment to Care.

CMC-Steele Creek is the area's first healthcare pavilion, which includes a 24-hour free-standing Emergency Department. It will offer emergency care continuously, seven days a week. Our facility will be available to see emergency patients of all ages for medical needs.

Having a hospital-affiliated emergency department in your community provides you with accessible and convenient care. And when that affiliation is with Carolinas Medical Center, the region's only Level I Trauma Center, you know you're getting the very best care possible.

Our Emergency Department will provide:

- Physicians board-certified in emergency medicine
- Emergency-trained staff to treat urgent and emergency situations
- On-call medical specialists available for consultation
- Rapid triage
- All private treatment rooms
- Bedside registration for convenience and privacy
- A 22,500-square-foot facility with eight treatment rooms, including one designated as a trauma/resuscitation room and seven emergency/urgent care treatment rooms
- Two private observation beds for monitoring by our medical staff
- A full range of laboratory services
- An array of radiology services, including the most up-to-date CT scanner, digital X-ray and ultrasound
- Emergency transportation by ambulance and helicopter for critically ill or injured patients
- Direct access to Carolinas Medical Center-Pineville and the advanced trauma services and resources at Carolinas Medical Center, the region's only Level I Trauma Center.

If You Need A Transfer To A Hospital

A patient who requires hospitalization will be transported in an emergency vehicle to a hospital for further care. Our Emergency Department physicians communicate electronically with area hospitals to transmit patient data and test results, so physicians at the hospital will have information about your condition when you arrive.

Primary Care Physicians Right Next Door

If any member of your family needs a primary care physician, the healthcare pavilion at CMC-Steele Creek is also home to several physician offices. Charlotte Pediatric Clinic, Mecklenburg Medical Group and Piedmont GYN/OB will be available to you at this comprehensive pavilion. On-site diagnostic services include laboratory, X-ray and CT scans, so it's easy to get access when tests are needed.

Selecting a personal physician who's connected to the region's most advanced healthcare system has another advantage, too. If you or someone in your family has additional needs in the future, it's important to choose a physician with immediate access to the region's most sophisticated specialists in cardiology, oncology, pediatrics, and pulmonary medicine. The physicians at the healthcare pavilion at CMC-Steele Creek are closely linked to those specialists, and many more.

If You Need To Fill A Prescription

With our pharmacy planned for the same building as your physician, your trip home will be made even easier. Your physician can send your prescription to CMC Rx and take the hassle out of stopping somewhere else on your way home.
